

I urge the FCC to reject NAB's petition 04-160 and to fully support the advancement of satellite radio in the United States. I do not see why the NAB is concerned about the traffic and weather feeds provided by satellite radio. In using satellite radio, I am paying for a service that I feel should not subject to the concerns of the NAB. If they are concerned that their market share is going to suffer due to satellite radio, they should improve their product. This is the fundamental idea behind our free market system in the United States. To stifle this is, in effect, squashing the American Dream.

Much like satellite TV has helped to improve the cable industry, I hope that satellite radio will do the same. But, I feel strongly that I should be able to receive the satellite feeds provided by my service provider without any interference from the desires of the NAB and their bullying tactics.

Again, I urge you to reject NAB's petition 04-160.
